Boiler inspection services

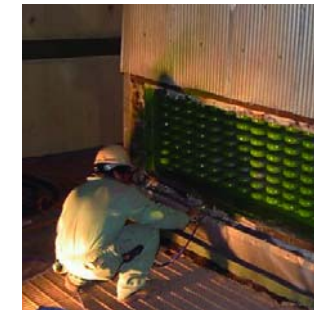

Choose Whertec Mechanical and it's repaired right and maintained to last.

From power producers to steel manufacturers, paper mills, chemical plants and refineries, there's one thing in common. You rely on boilers and pressure vessels to create your finished products.

WHERTEC MECHANICAL CAPABILITIES

- » Code weld repair specialist on ASME section 8 pressure vessels
- » Code weld repair specialist on ASME section 1 boilers
- » Certified NBIC R Stamp to perform work nationwide
- » Automated weld overlay capabilities for vertical and horizontal on-site applications
- » Automated blast and coating capabilities for vessels and tanks
- » Turnkey maintenance services
- » Project management, repair and budget forecasts and reports, inspections and scaffolding
- » Self-sufficient crews with trained and experienced supervision

It's a harsh environment. High pressure. Extreme heat. Erosion and corrosion take their toll. And before you know it, you're faced with a costly shutdown to repair the problem. Still worse, you have to contend with this inevitability time after time.

Whertec Mechanical specializes in corrosion and erosion repair and maintenance services. And if something needs to be replaced or upgraded, we're your solution. We offer fast and efficient mechanical repair with an extreme attention to detail and quality control.

The bottom line is this.

With Whertec Mechanical at your side, you can be confident in the reliability of your operation. And that means less downtime and greater profitability.
